Industry Advisory

Operational Policies

The Board has reviewed and updated its policy guidelines. They are now called "Operational Policies". These policies have been reorganized so they are arranged by subject. Some policies have been amalgamated, and redundant policies have been deleted. A few new policies have been added. A table of concordance sets out the changes in more detail.

The policy revisions required some amendments to the Board's Rules of Practice and Procedure. Changes include:

- Expansion of rule 8 regarding procedures for "urgent public need" requests
- Changes to rule 28 which outlines procedures for revisions of published applications
- New rule 44 regarding crew transportation contracts and requirements
- New rule 55 with respect to fleet size reviews

Changes are effective as of May 28, 2008 and are posted on the Board's website.
