Industry Advisory

Annual Taxi Camera Inspections

This is a reminder. Taxi cameras must be inspected every year. The cameras must be inspected after a windshield is replaced or after a major accident.

A designated inspector must do the inspection. Also, taxis must use Board-approved taxi cameras (i.e., a dual-cam model by VerifEye) and a designated installer. Compliance improves the safety of drivers and passengers.

Board taxi camera standards are posted at <http://www.th.gov.bc.ca/ptb/cameras.htm>. Details about local taxi programs are posted on the same web page.
